Question 1

For this implementation..

```
removeall(item):
```

```
    tempQueue = new queue
```

```
    While !this.isEmpty:
```

```
        Current = this.dequeue()
```

```
        If (current != item):  
            tempQueue.enqueue(current)
```

```
    This = tempQueue
```

Question 2
